VEKTA
STAKROLLER

/ TOP VIEW

/ SUMMARY

With Vekta's StakRoller, utilise or recapture precious floorspace whilst increasing your productivity and eliminating bottle necks.

The StakRoller keeps truss stacks in the optimal orientation for picking up with a forklift.

/ SPECIFICATIONS

Weight limit (18m span)	4500 kgs
Speed	500mm per sec
Max. stack height	40 trusses
Rollers per set	4
Max. number of rollers	Unlimited

/ FEATURES

- Can be built to any length or extended later, conveniently built in bays to facilitate scaling and maintenance
- Retractable reaction posts allow apex inverted stacking and rolling of trusses

- Allows for on-the-spot strapping of trusses, moving them quickly and making room for the next set

/ OPTIONS

- Set up multiple bays downstream to organise your flow and truss placement
- Extra safety features available upon request and can be installed at a later date

- Multiple modes of operation – systems rolls trusses and prepares for the next one
