VEKTA NOG NAILER

/ SIDE VIEW

/ TOP VIEW

/ SUMMARY

The Vekta Nog Nailer is the ideal stud-nog assembly solution for those plants that already pre-cut or buy their studs and nog components.

A simple machine that clamps the stud and nog into position before dual nailing it in place with a single action.

It also offsets every second component to make installation of components quicker and safer for your mainline operator.

/ SPECIFICATIONS

Timber width / height	70-90 mm wide 35-45 mm thick
Nailing cycle time	3-4 s

* Actual results are site dependent with consideration to timber condition and member geometries.

/ FEATURES

- Small footprint, safe and easy to use
- Automatically offsets every second nog for easy install
- Can be used with either 35mm or 45mm timber
- Extended table to allow the easy lining up of blocks with studs (manual)

/ OPTIONS

- Flexible nail gun integration, with larger coil options
